-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2004.
2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-13 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art (AAPA) in view of Engle (U.S. Patent 5286232).

AAPA as found on page 1 , line 7- page 3, line 22 of the specification, discloses a method of manufacturing a shah sleeve structure for use in an optic module capable of being slid along a guiding shaft, comprising steps of: providing a slider comprising a first segment, a second segment and a central segment; encapsulating the first segment, said second segment and the central segment of the slider within said optic module when forming the optic module; providing a driving force for drawing out the slider in the direction from the second segment toward the first segment and defining a passage on the optic module; and mounting a first bearing and a second bearing at two opening ends of the passage respectively, wherein the first bearing has an internal diameter the same as that of the second bearing.

But AAPA fails to teach the first segment has an internal diameter larger than that of said second segment, and the central segment has an internal diameter gradually tapered from the first segment to the second segment.

Art Unit: 3726

Engle teaches the first segment has an internal diameter larger than that of said second segment, and the central segment has an internal diameter gradually tapered from the first segment to the second segment. (Figure; abstract)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the segment of AAPA by adding the features of Engle so as to eliminate the axial oscillating movement.
